

Vague Terms

Writing Solutions Guide

How to Use This Guide

This guide provides specific solutions for writing issues detected by the DocScanner AI system. When the AI flags a writing issue, refer to this guide for step-by-step solutions.

Common Issues Detected

- Vague quantifiers
- Imprecise language
- Ambiguous instructions

Solutions

Solution 1: Vague Quantifiers

Issue: Uses imprecise terms like "some," "many," "few"

Solution: Replace with specific quantities or clear descriptions

Before (Incorrect):

Wait a few seconds for the process to complete.

After (Correct):

Wait 5-10 seconds for the process to complete.

Best Practice: Use specific numbers, timeframes, or measurable criteria

Why This Matters: Precise language sets clear expectations and reduces confusion

Solution 2: Ambiguous Instructions

Issue: Instructions that can be interpreted multiple ways

Solution: Provide specific, step-by-step instructions

Before (Incorrect):

Configure the settings appropriately.

After (Correct):

Set the timeout to 30 seconds and enable automatic retry.

Best Practice: Specify exact actions, values, and parameters

Why This Matters: Clear instructions prevent errors and support successful task completion

Quick Reference

Use this section for quick lookup when fixing issues:

| Problem | Quick Fix |
|------------------------|--|
| Vague Quantifiers | Replace with specific quantities or clear descriptions |
| Ambiguous Instructions | Provide specific, step-by-step instructions |
