Terminology Rules

Writing Solutions Guide

How to Use This Guide

This guide provides specific solutions for writing issues detected by the DocScanner AI system. When the AI flags a writing issue, refer to this guide for step-by-step solutions.

Common Issues Detected

- Inconsistent technical terms
- Non-standard terminology
- Ambiguous terms

Solutions

Solution 1: Inconsistent Technical Terms

Issue: Same technical concept referred to with different terms

Solution: Standardize on one preferred technical term

Before (Incorrect):
```
Open the dialog box... Close the popup window... Exit the modal
```
After (Correct):
```
Open the dialog box... Close the dialog box... Exit the dialog box
```

Best Practice: Create and follow a technical terminology glossary

Why This Matters: Consistent terminology prevents confusion in technical procedures

Solution 2: Non-Standard Terminology

Issue: Uses non-standard or deprecated technical terms

Solution: Replace with current, industry-standard terminology

Before (Incorrect):
```
Right-click on the icon to access the popup menu
```
After (Correct):
```
Right-click on the icon to access the context menu
```

Best Practice: Use current industry-standard terms for UI elements

Why This Matters: Standard terminology aligns with user expectations and training

Quick Reference

Use this section for quick lookup when fixing issues:

Problem	Quick Fix
Inconsistent Technical Terms	Standardize on one preferred technical term
Non-Standard Terminology	Replace with current, industry-standard terminology
